REAL
Real Tenants
Never pooled instances
group by instances
Per-tenant Histograms
Make K bins
score every pair
Observed Spread
Mean pairwise JS = D̄(0.42)
SYNTHETIC
Pooled Mean
p̄ over all tenants
used as the mean
Dirichlet Sweep
Dir(α · p̄),
α = 0.1 ... 30
draw n clients per α
Synthetic Spread
mean pairwise JS as a function of α
Match
find α where synthetic = observed
Recovered α ≈ 3.34
